

TECHNOLOGY PARTNER · ONEBEAT

Precision Inventory Intelligence, Built for Every Vertical

How advance2global's partnership with Onebeat helps retailers eliminate stockouts and overstock — vertical by vertical.

Across Hardware & DIY, Home Decor & Flooring, Lumber & Builders Merchants, Lawn & Garden, and Farm & Ranch retail, the same problem shows up in different clothing: stockouts on bestsellers, overstock on slow-movers, and cash tied up in inventory that isn't moving.

advance2global partners with Onebeat, the AI-driven inventory engine trusted by 200+ brands, to solve it — replacing static seasonal forecasts with daily, store-level demand sensing that triggers replenishment, transfers, and pullbacks before the shelf tells you there's a problem. Onebeat plugs into your existing POS/ERP and starts delivering results in 90 days or less — no rip-and-replace.

71%

typical stockout reduction Onebeat delivers within 90 days — reported consistently across advance2global's hardware, home decor, building materials, and farm & ranch retail verticals.

The same engine, tuned for five very different retail floors. The next page walks through how the Onebeat advantage plays out in each.

05 Farm & Ranch

The Onebeat Advantage, By Vertical

Hardware & DIY

Inventory is working capital. Onebeat spots demand spikes instantly, keeps "bread and butter" basics like fasteners in stock, and triggers intelligent store transfers so a sold-out SKU in one location doesn't cost you a sale in another.

90% full-price sell-through · 33% lower inventory · 50% higher turnover

Home Decor & Flooring

Balances the "high-low" mix — keeping evergreen basics deep while moving trend-driven decor and flooring before it dates, with intelligent batch/dye-lot rebalancing so full-room orders ship from a single location.

71% stockout reduction · 60% faster turns · 43% of transfers sell in 30 days

Lumber & Builders Merchants

Syncs your yard with the heartbeat of the job site — the right grade of lumber, pallet of cement, or SKU of hardware in stock exactly when the contractor's truck pulls in, while protecting margins from commodity price swings.

71% stockout reduction · 33% leaner inventory · 43% of transfers sell in 30 days

Lawn & Garden

Treats inventory like a living ecosystem — sensing the spring rush and seasonal cliffs at the local level, so centers are primed for every surge without carrying costly "dead wood" into the off-season.

71% stockout reduction · 33% leaner inventory · 60% faster turns

Farm & Ranch

Keeps specialized inventory exactly where the rancher needs it — from calving season to harvest rush — with intelligent store transfers that fulfill local demand from neighboring branches instead of new freight, protecting the trust of your biggest agricultural accounts, including retailers like Buckerfields.

71% stockout reduction · 33% lower working capital · 43% of transfers sell in 30 days

Built for Trust, Not Just Turnover

Trusted by 200+ brands

Live in 90 days or less — no rip-and-replace

Why advance2global + Onebeat

advance2global brings Onebeat's AI-driven inventory engine to retailers across every vertical we serve — scoping the fit, managing the POS/ERP integration, and supporting the rollout, so your team gets the lift without carrying the project.
